Join the meeting

The seminar *Artificial Intelligence in English Language and Translation: Bridging Research and Practice* explores the transformative role of artificial intelligence across language education and translation. Bringing together scholars working at the intersection of pedagogy, research, and professional practice, this conversation will examine how AI is reshaping the ways languages are taught, learned, and mediated. As AI technologies increasingly function as cognitive and institutional actors, the seminar will address key issues such as teacher agency, ethical use, evolving translation practices, and the challenges of applying AI in diverse and often unequal educational contexts. By connecting theoretical insights with real-world applications, the event aims to foster a critical dialogue on how to engage with AI in ways that are informed, responsible, and context-sensitive.

The I-LanD Research Centre is delighted to invite you to this seminar of “*The I-LanD Seminar Series – 4th Edition*”.

Innovative in nature, the I-LanD Seminar Series showcases convenors debating issues in their field(s) of expertise. The seminars aim to encourage speakers to reveal insights, introduce adopted methodologies, highlight pitfalls, and generally expand knowledge in a given area. Each co-host will briefly present their contribution to the theme of the seminar. At the end of each round, fellow convenors and audience members will ask questions on the topics presented, in order to foster an enriching and productive discussion.

The seminar “Artificial Intelligence in English Language and Translation: Bridging Research and Practice”, scheduled for Thursday, April 23rd, 2026, 16:30–18:30 (CET), will feature contributions from **Ezgi Aydemir Altaş** (Yıldız Technical University), **Elif Buber** (Center for Innovative Education), **Alessia Chiriatti** (Istituto Affari Internazionali), **Marián Kabát** (Comenius University Bratislava), **Achilleas Kostoulas** (University of Thessaly), in conversation with **Francesca Raffi** (University of Macerata).

We look forward to welcoming you to this inspiring discussion.
