SemEval-2012 : Semantic Evaluation Exercises

International Workshop on Semantic Evaluations
an ACL-SIGLEX event in conjunction with *Sem Conference

NAACL-HLT Montreal, Canada June 7 - 8, 2012

The Semantic Evaluation (SemEval) series of workshops focuses on the evaluation of semantic analysis systems with the aim of comparing systems that can analyse diverse semantic phenomena in text.

SemEval-2012 will be associated with the new *SEM, First Joint Conference on Lexical and Computational Semantics, and co-located with NAACL, Montreal, Canada.

SemEval-2012 provides development, training and test datasets for a range of interesting and challenging semantic analysis problems. We welcome individual researchers or teams to participate and contribute.

Important Dates

- **March 15, 2012 onwards**
  [Start of evaluation period]

- **April 1, 2012**
  [End of Evaluation Period]

- **April 11, 2012**
  [Paper submission deadline]

- **April 23, 2012**
  [Reviews due]

- **May 04, 2012**
  [Camera Ready]

The Tasks

1. English Lexical Simplification
2. Measuring Degrees of Relational Similarity
3. Spatial Role Labeling
4. Evaluating Chinese Word Similarity
5. Chinese Semantic Dependency Parsing
6. Semantic Textual Similarity
7. COPA: Choice Of Plausible Alternatives An evaluation of commonsense causal reasoning
8. Cross-lingual Textual Entailment for Content Synchronization
