

INTERNATIONAL JOURNAL of COMPUTATIONAL LINGUISTICS (IJCL)

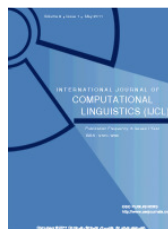

International Journal of Computational Linguistics (IJCL) is a peer-review open access bi-monthly journal providing a scientific forum where computer scientists, experts in artificial intelligence, mathematicians, logicians, cognitive scientists, cognitive psychologists, psycholinguists, anthropologists and neuroscientists can present research and experimental studies. The journal publishes papers that describe state-of-the-art techniques, scientific research studies and results in computational linguistics in general but computational models, corpus linguistics, computational theories, information retrieval and extraction, linguistics modeling techniques, linguistics theories, machine translation, natural language processing, quantitative linguistics, speech analysis and speech recognition in particular.

CALL FOR EDITORS & REVIEWERS

CSC Journals strongly believe that the reason of IJCL success is the “*Collective Efforts Strategies*” adopted by its editorial board members as these collective efforts strategies exponentially boost the International image of IJCL, its editorial board members and ultimately CSC Journals. IJCL editors are trusted for maintaining the International standards of peer-review and maintain a sense of ownership over the journal as the journal is brain child of their continuous efforts. IJCL consider its editors as the ambassadors who always strive for introducing the journals to their colleagues, researchers, research centers and libraries around the globe.

CSC Journals invites scholars, researchers and academic professionals, who think ahead, move fast, promote change and continuously apply innovative ideas and approaches to maintain the high quality research platform for what CSC Journals has promised to International research communities.

ISSN (Online) 2180-1266
Year of Publication 2012
Publication Frequency Bi-Monthly
Publisher
Computer Science Journals, Kuala Lumpur, Malaysia

LIST of TOPICS

- Computational Linguistics
- Computational Models
- Computational Theories
- Corpus Linguistics
- Formal Linguistics-Theoretic and Grammar Induction
- Information Retrieval and Extraction
- Language Generation
- Linguistics Modeling Techniques
- Linguistics Theories
- Machine Translation
- Models that Combine Linguistics Parsing
- Natural Language Processing
- Quantitative Linguistics
- Speech Recognition/Understanding
- Web Information Extraction/Mining

IJCL READERSHIP

IJCL mainly attracts speech professionals, philosophers, industry and university linguists, linguistic specialists, researchers and industrial experts by providing both the theoretical research and experimental results made by other researchers and scientists in the field of computational linguistics.

Computer Science Journals (CSC JOURNALS)

B-5-8 Plaza Mont Kiara, Mont Kiara
50480, Kuala Lumpur, MALAYSIA

CSC JOURNALS SUBSCRIPTION

IJCL offers great subscription packages including

- ✓ Yearly Subscription
- ✓ Discounted Packages
- ✓ Archive Subscription
- ✓ Custom Subscription Choice

CONFERENCE PARTNERSHIP PROGRAM (CPP)

Being appreciated for keeping its promise of EXCELLENCE IN EDUCATION, RESEARCH AND SERVICES and a true disseminator of modern scientific research, CSC Journals provide one of the strongest International open access platforms to research communities; yet CPP is another outstanding service of this chain. Being a value added service CPP is a step towards increasing the collaboration and coordination between conference organizers, conference participants and publisher. IJCL invite conference organizers from each corner of the world belonging to diversified areas of research to establish collaboration of their International conference with CSC Journals.

CPP service benefits its partners by providing International exposure and recognition to the conference. Best papers presented in conference proceedings are given full fee waiver as a token of appreciation from CSCRS. CPP provides excellent platform for **Call for Conferences**. For further details, please contact coordinator@cscjournals.org.

CSC RESEARCH SCHOLARSHIP PROGRAM (CSCRSP)

To support exceptionally talented young scientists and students, IJCL offers CSC Research Scholarship Program (CSCRSP) to contribute to the new dimensions of research and development in the field of computational linguistics.
